

NETneighbor at Tributary

Tributary at New Manchester, the 2,500 home master plan community surrounding a Marriott Resort with championship golf course and adjacent Sweetwater Creek Recreation Park on the western edge of Atlanta, selected NETneighbor - The Connected Community to coordinate all resident communications systems. Digital television, always-on high-speed Internet, local and long distance telephone, and security monitoring services will be available to every household and recreation facility at a much lower cost than independent services.

NETneighbor, the creation of PTC Computer Solutions of Jacksonville, coordinates expert strategic partners for off-site communications coupled with its intranet system linking every household to community amenities and other households through computer bulletin boards, calendars, reservations systems, newsletters, special alerts, homeowner organizations, local news and weather, email and more. At Tributary it also is providing high-speed wireless "Hot Spots" in amenity common areas for residents to remain connected away from home.

Tributary is the sixth and largest NETneighbor community in Florida and Georgia. To find out more about this state-of-the-art community communications system, contact President David W. B. Parker at (904) 992-1742 or info@netneighbor.net.
